

Updated Table of Contents

From Knowledge to Power: The Comprehensive Handbook for Climate Science and Advocacy

Preface

Chapter 1 – Earth’s Climate System

- Describing the Earth
- The Sun and the greenhouse effect
- The carbon cycle
 - Carbon movements through land, ocean and atmosphere*
 - Short and long timescales of the carbon cycle*

Chapter 2 – Earth Out of Balance

- Natural influences on climate
- Carbon dioxide and temperature
 - Denial of the data*
- Paleoclimatology
- Human influences on climate: greenhouse gases
 - Methane and nitrous oxide*
 - Ozone, halocarbons, and short-lived pollutants*
- Aerosols and clouds
- Land use change

Chapter 3 – Climate models and carbon budgets

- A cornucopia of fossil fuels
 - Reserves and resources*
- Climate models and carbon budgets
 - Basics of climate modeling*
 - Climate models: simple and complex*
 - Reliability of climate models*
 - Carbon budget estimates*
- Pathways for decarbonization

Chapter 4 – Impacts of climate change

- Evitable and inevitable impacts
Climate tipping points
- Ice loss and sea level rise
- Extreme weather
Earth's hydrological cycle
- Ecology and biodiversity
Endangered species
Fragile marine ecosystems
Forests and terrestrial ecosystems
- The human world
Food and water
Health
Economy
Intergenerational equity

Interlude: The renewable energy transition

Our present situation
Social and cultural dimensions
Roadmaps for the US
An advocacy agenda for the 2020s

Chapter 5 – Climate advocacy

- Is technology necessary?
- The climate advocacy landscape
Two faces of climate advocacy
The EcoRight
- Equity and climate policy
The Green New Deal
- Practical strategies for advocacy
Resources for advocates
Climate narratives

Chapter 6 – Fossil fuels: business and politics

- The business of fossil fuels
 - The demise of coal*
 - Oil and gas production*
 - Business strategies of oil and gas firms*
 - Advocacy: Divestiture*
- Fossil fuel politics
 - Subsidies*
 - Promotion of climate change denialism*
 - Advocacy: Lawsuits*
- The role of government
 - Federal emergency powers*
 - Basics of environmental regulation*
 - Regulation of carbon dioxide emissions*
 - Regulation of methane emissions*
 - State and local actions*
 - Transporting and exporting fossil fuels*

Chapter 7 – Carbon pricing

- Why price carbon?
- Approaches to carbon pricing
- US emissions trading systems
 - Cap and trade in California*
 - The Northeast's Regional Greenhouse Gas Initiative (RGGI)*
 - Advocacy: Expanding the state and regional programs*
- Prospects for carbon taxes
 - Federal carbon tax proposals*
- Carbon pricing politics

Chapter 8 – Carbon-free power

- Powering the US electricity grid
 - Solar power*
 - Wind power*
 - Hydroelectric power*
 - Geothermal power*
 - The nuclear option*
- A net carbon-free grid by 2050
- Policies for renewable electricity
 - Renewable and clean energy standards*
 - Advocacy: influencing state electricity policy*
 - Modernizing the electricity grid*
 - Distributed solar power*

Chapter 9 – Carbon-free lifestyles

- Industry
 - Steel, cement and petrochemicals*
 - Policies to reduce industry emissions*
 - Refrigeration: hydrofluorocarbons (HFCs)*
 - Waste management: methane*
- Renewable hydrogen and carbon
- Transportation Fuels
 - Crop biofuels and their discontents*
 - Carbon intensities and climate impacts*
 - The growing reach of the LCFS*
 - Biofuels: policy and advocacy*
- Electric vehicles
 - Electric vehicle technology*
 - Policy and advocacy*
- Cities
 - Urban climate plans*

Chapter 10 – Carbon removal and geoengineering

- The carbon removal challenge
- Natural land management
 - Afforestation and forest restoration*
 - Forests: policy and advocacy*
 - Agriculture and grasslands*
 - Sustainable agriculture: policy and advocacy*
 - Livestock management*
- Carbon capture technologies
 - Carbon capture and storage in industry (CCS)*
 - Carbon capture and utilization (CCU)*
 - Direct air capture and storage (DACs)*
 - Accelerated weathering*
 - Bioenergy with carbon capture and storage (BECCS)*
 - Carbon removal: policy and advocacy*
- Solar geoengineering

Glossary
